

# HAIRCUTTING

[Todobellezapr.com](http://Todobellezapr.com)

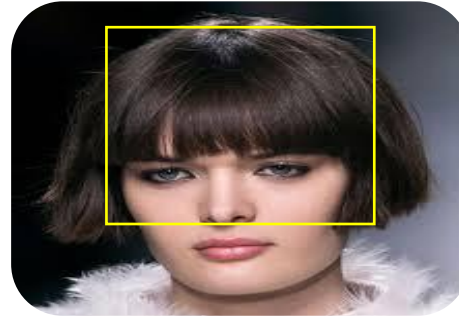

# Haircutting

- It is the artistic sculpting or the act of removing the length of the hair with scissors, thinning scissors, razors and/or clippers to create different shapes and figures.
- It is also known as hair sculpting.

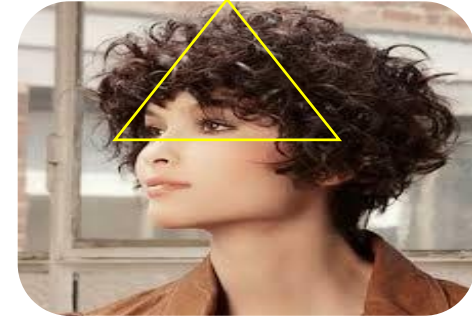

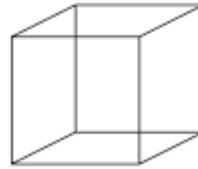

# Form- (in haircut)

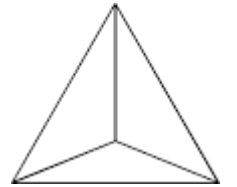

It is the three-dimensional representation of a figure that has a length, a width, and a depth.

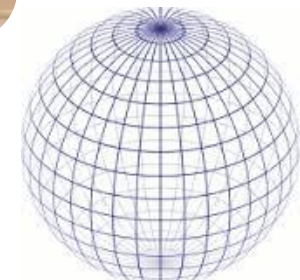

square

triangular

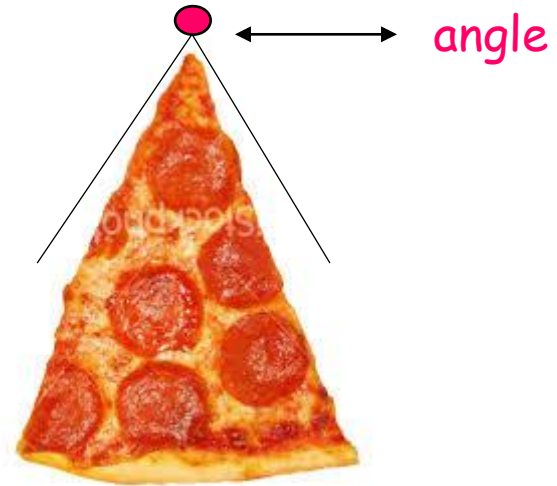

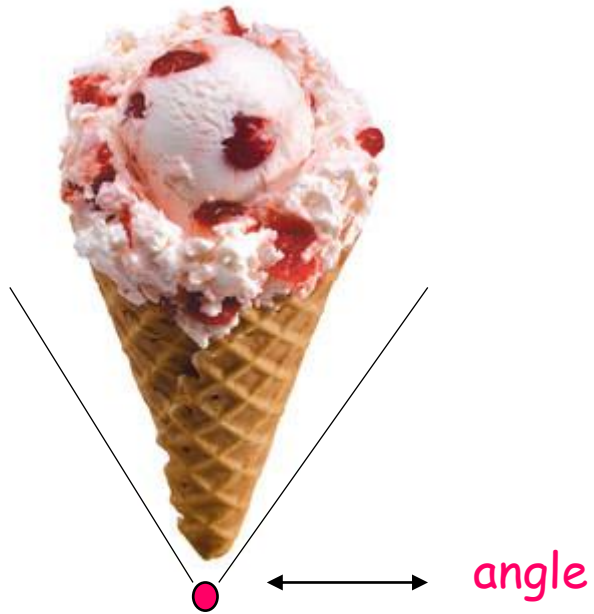

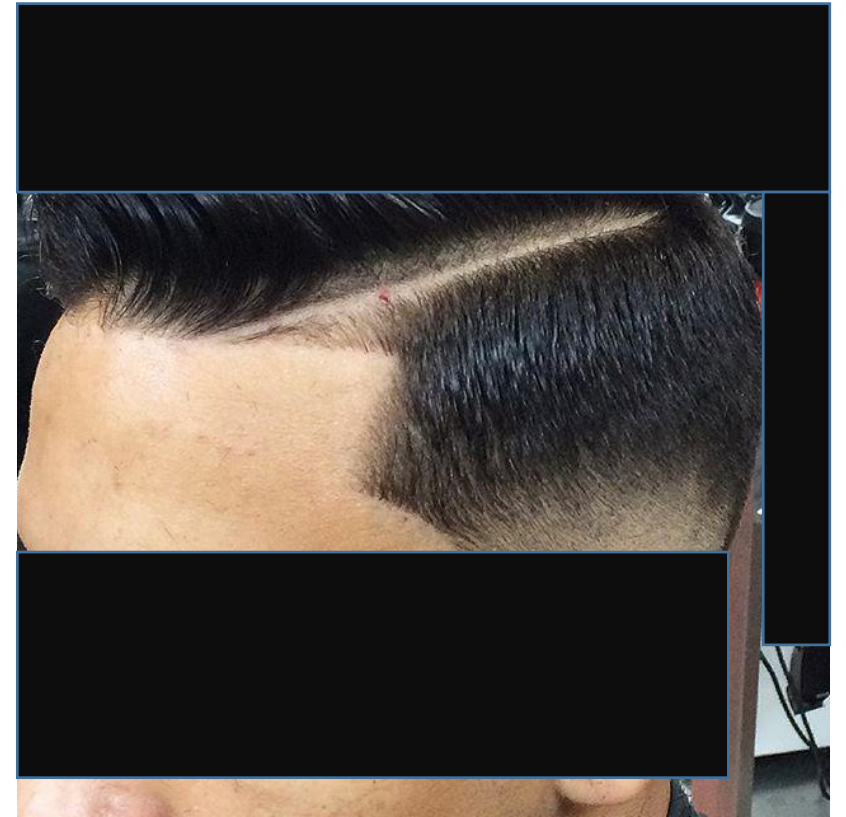

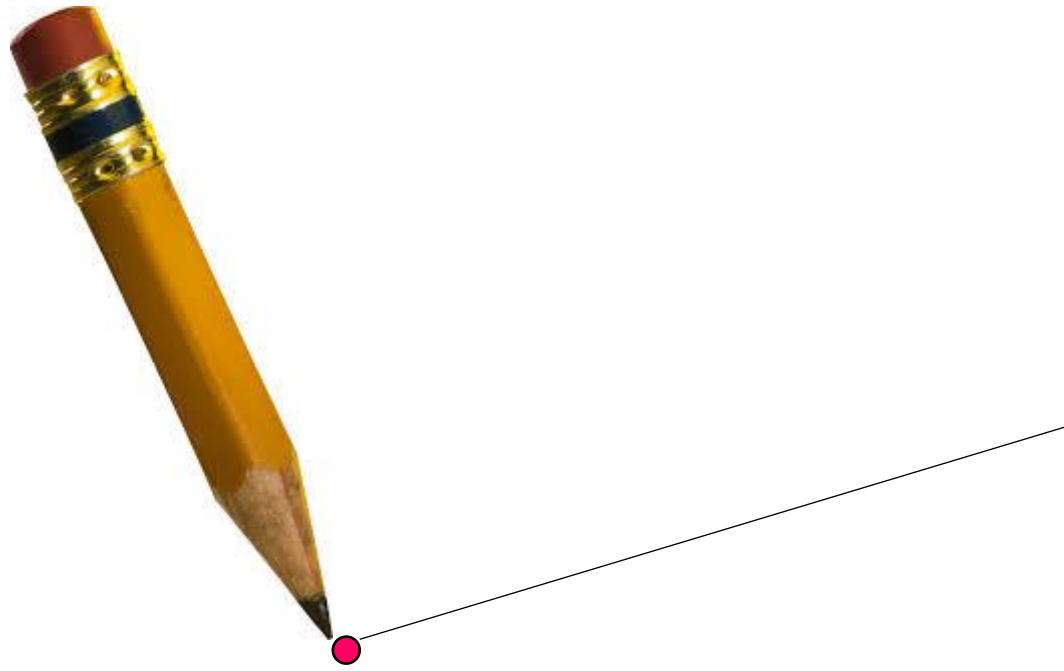

round

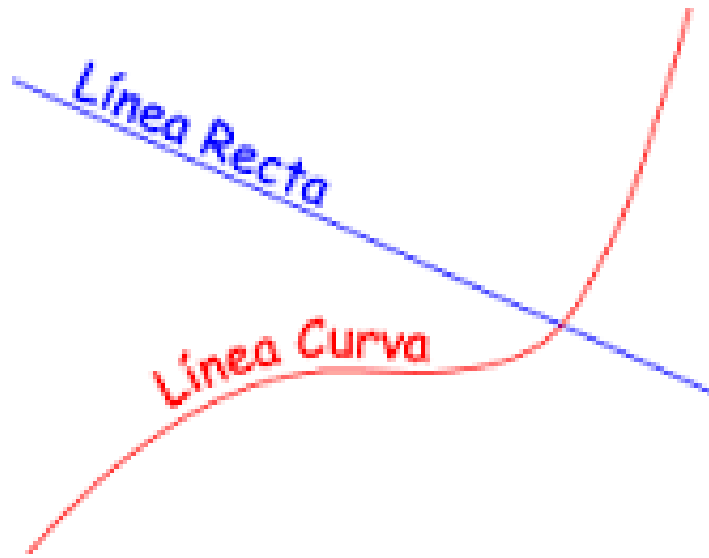

# Points, lines and angles

- All shapes and figures are made up of points, lines and in some cases angles.

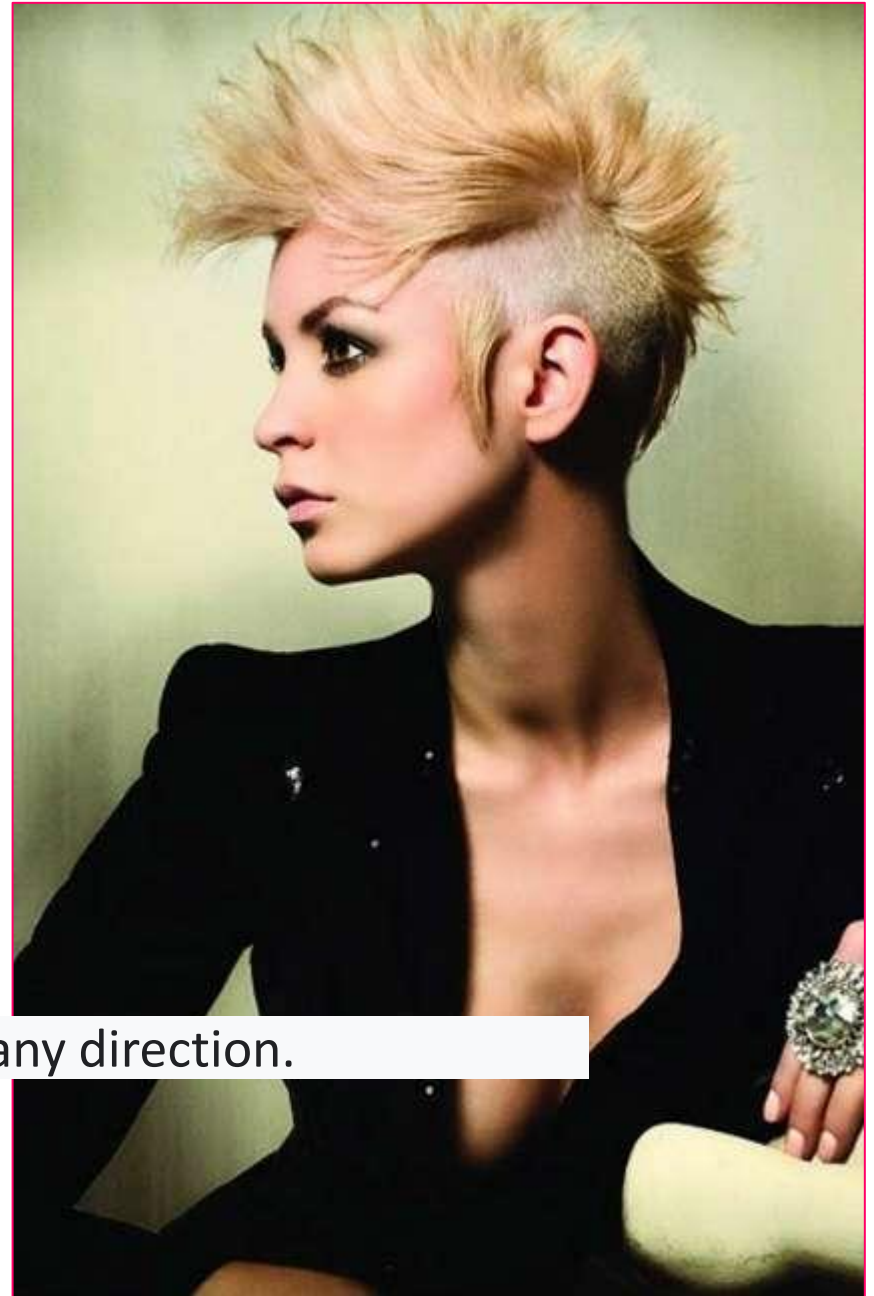

A point is a sign or mark that when extended becomes a line.

A line can be straight or curved and can move in any direction.

# There are 3 basics straight lines

horizontal

vertical

diagonal

Horizontal lines are parallel to the horizon and are considered stable or inert.

These lines create a sensation of maximum weight or stability.

Vertical lines go from top to bottom and create a sensation of movement and harmony.

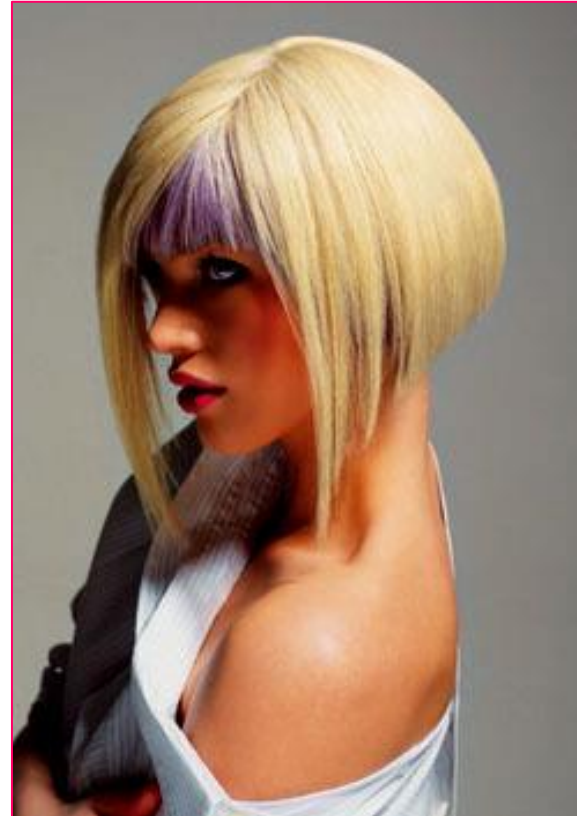

Diagonal lines fall between horizontal and vertical lines.

A forward diagonal line goes towards the face...

...while the backward diagonal line moves away from the face.

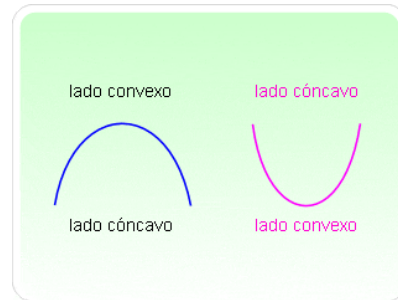

Both lines create the illusion of movement.

# There are 2 basic curved lines

**Concave**  
They are inward  
curved lines.

**Convex.** They are  
curves lines that  
curve outward.

Both lines are a combination of a diagonal line to the right and a diagonal line to the left. Create a sensation of movement.

# Tools for hair cutting include

scissors

thinning  
scissors

razor

hair trimmer

comb
